PROFESSIONAL SUMMARY

Junior Data Analyst and AI enthusiast with hands-on experience building machine learning models and AI-powered applications. Skilled in data analysis, predictive modeling, and transforming raw datasets into actionable insights. Experienced in developing end-to-end ML systems and integrating them into real applications using modern frameworks. Passionate about applying AI and data science to solve real-world problems, particularly in fast-growing sectors such as fintech.

EDUCATION

Fellow

Publica Academy

Data Analyst, AI/ML Engineering Fellow.

08/2025 – 03/2026

Abeokuta, Nigeria.

National Innovative Diploma (NID)

Soteria Business School

Upper Credit – GPA: 3.26

2022

TECHNICAL SKILLS

Programming Languages

Python, JavaScript

Data Science & Machine Learning

Pandas, NumPy, Scikit-learn, PyTorch

AI / LLM Development

Transformers, LangChain, LangGraph

Data Analysis

Exploratory Data Analysis (EDA), Data Cleaning, Feature Engineering, Model Evaluation

Backend Development

FastAPI

Frontend Development

React, Tailwind CSS

Tools & Workflow

Git, Jupyter Notebook

INTERESTS

Artificial Intelligence | Financial Technology (FinTech) | Machine Learning Systems |
Data-Driven Decision Making

PROJECT EXPERIENCE

AI-Powered Application Development

- Built AI-driven applications using transformer-based models and modern ML frameworks.
- Integrated AI systems with backend APIs to enable real-time interaction and predictions.
- Designed modular pipelines for model inference and intelligent responses.

End-to-End Machine Learning Prediction System

- Developed a complete ML workflow including data preprocessing, model training, and evaluation.
- Applied feature engineering techniques to improve model performance.
- Deployed the trained model using FastAPI for real-time prediction.

Data Analysis & Insights Generation

- Conducted Exploratory Data Analysis on datasets to identify patterns and key insights.
- Performed data cleaning and transformation using Pandas and NumPy.
- Created structured reports to communicate findings and model performance.

Vector-Based AI Retrieval System

- Built a semantic search system using vector embeddings.
- Implemented contextual information retrieval for AI-powered applications.
- Designed scalable architecture for knowledge-based systems.

Full-Stack AI Application (React + FastAPI)

- Developed a full-stack AI solution integrating machine learning models with a user-friendly frontend.
- Implemented API endpoints for prediction services and data processing.
- Designed responsive UI using Tailwind CSS.

CORE COMPETENCIES

Machine Learning Model Development

Data Analysis & Statistical Thinking

AI Application Development

Problem Solving & Analytical Thinking

API Development for ML Systems

Collaborative Teamwork
