

Dear Hiring Manager,

I am writing to express my interest in the **Junior AI Data Analyst** position. With a strong foundation in machine learning, data analysis, and AI application development, I am excited about the opportunity to help your organization transform data into actionable insights and build intelligent, data-driven solutions.

Through my fellowship in **Machine Learning and AI Engineering at Publica Academy**, I have gained practical experience in analyzing datasets, performing exploratory data analysis (EDA), cleaning and preprocessing data, engineering features, and building predictive models using Python, Pandas, NumPy, Scikit-learn, and PyTorch. I have also developed end-to-end machine learning pipelines, deployed AI models with FastAPI, and created AI-powered applications using transformer models, LangChain, and vector databases.

Beyond technical expertise, I enjoy uncovering patterns in complex datasets, communicating insights clearly, and applying analytical thinking to solve real-world business challenges. My experience integrating machine learning models into production-ready applications has strengthened my understanding of how data analytics and AI can drive operational efficiency and strategic decision-making.

I am particularly drawn to this opportunity because it combines data analysis with artificial intelligence, allowing me to leverage both my analytical skills and my passion for emerging AI technologies. I am eager to contribute to your team by delivering accurate analyses, building scalable AI solutions, and continuously learning new technologies to create measurable business impact.

Thank you for considering my application. I would welcome the opportunity to discuss how my background, technical skills, and enthusiasm for AI and data analytics can contribute to your organization. I look forward to hearing from you.

Sincerely,

Divine Joshua Gbadamosi

Abeokuta, Ogun State, Nigeria
